TO WHOM IT MAY CONCERN

This is to certify that the wonderful wood commercially known as "TUFWUD" is processed by M/S Khemka Timber Pvt. Ltd. , 67/22 Strand Road, Calcutta-700 006 . Tufwud is seasoned and chemically treated . Tufwud offers all the qualities of timber and its properties are comparable to any other high quality timber available in India. This timber is not prone to bending , warping and cracking and is not susceptible to termite , moth and fungus attack. The density is quite right for easy carpentry work and is ideal for doors, windows, furniture, structurals etc.

Tufwud is being regularly used by M/S Eskay's Doctrine Equipments , Calcutta-59 for the manufacture of the finest quality of school Equipments and other allied Teaching and Training Aids because Tufwud can easily be painted and polished by any variety of paints. Due to its dry nature, painting done is more glossy and durable.

I wish them all success for further improvement of tufwud.
